How do I allow the FilesThruTheAir™ WiFi Sensor Software to communicate through my Windows firewall?

1. Open your Windows Firewall
2. In the left pane, click Allow a program or feature through Windows Firewall.
3. Click Change Settings. If you’re prompted for an administrator password or confirmation, type the password or provide confirmation.
4. Select the check box next to the program you want to allow, select the network locations you want to allow communication on, and then click OK.

How do I open the ports required by the FilesThruTheAir™ WiFi Sensor Software?

1. In the left pane, click Advanced Settings. If you’re prompted for an administrator password or confirmation, type the password or provide confirmation.
2. In the Windows Firewall with Advanced Security dialog box, in the left pane, click Inbound Rules, and then, in the right pane, click New Rule.
3. Select Port and click Next.
4. Select TCP and Specific Local Port and type 10080 in the box.
5. Click Next and select Allow the connection
6. Click Next and tick the required boxes
7. Give the rule a name and click Finish
8. Follow the same rules for UDP ports 1024 and 8010
