How do I allow the FilesThruTheAir™ WiFi Sensor Software to communicate through my ZoneAlarm firewall?

Open ZoneAlarm Pro Antivirus and Firewall

1. In the Firewall tab, click Settings for the Application Control category.
2. Click View Programs.
3. Click Add.
4. Select WiFi Sensor Software.
5. Click Open.

How do I open the ports required by the FilesThruTheAir™ WiFi Sensor Software?

Open ZoneAlarm Pro Antivirus and Firewall

1. Select Firewall.
2. In either the Trusted Zone or Public Zone area, click Custom. The Firewall settings dialog appears.
3. Scroll to the security level (High or Medium) to which you want to add ports.
4. Select the desired port type: incoming UDP, outgoing UDP, incoming TCP, or outgoing TCP.
5. You will need to unblock TCP port 10080 and UDP ports 1024 and 8010.
6. Click Apply, then click OK.
