EL-DataPad
Handheld Programmer and Data Collector for the EasyLog USB Range of Data Loggers

FEATURES

• Collects and stores data from at least 500 data loggers
• View downloaded data with general trend and summary screens
• Allows full or quick set-up of compatible EasyLog USB data loggers
• Touch screen interface for navigation of menus
• Stored data can be transferred to a PC/Mac via micro USB cable
• Use Lascar’s EasyLog USB software on a PC to graph data and export to Excel

The EL-DataPad allows users of Lascar’s EL-USB data loggers to configure their units and download data and view logging results on-the-spot rather than removing the logger from the environment being measured and taking it to their PC. This allows continual logging with shorter breaks in data collection, less travel for the user, on-site data collection in graph, legend and summary format and the ability for users to reconfigure loggers in “the field”.

The logger is connected to the EL-DataPad via a standard USB port at the top of the viewer. Once connected, the user is guided through a simple touchscreen menu with options to Set-Up, Stop & Download and View Data. On-screen instructions follow the same structure as Lascar’s EL-WIN-USB software for PC.

Data from up to 100 loggers can be viewed on the EL-DataPad, with data from a further 400 units stored on the unit at any one time. Data can be transferred to a PC or Mac using a micro USB cable supplied with the unit. Once uploaded, data is saved in comma separated variable (csv) format, making it suitable for import into spreadsheet packages such as Microsoft Excel or graphed on a PC using Lascar’s EL-WIN-USB software.

The EL-DataPad is compatible with the following EL-USB data loggers: EL-USB-1, EL-USB-1-LCD, EL-USB-1-PRO, EL-USB-2, EL-USB-2+, EL-USB-2-LCD, EL-USB-2-LCD+, EL-USB-TC, EL-USB-TC-LCD, EL-USB-LITE, EL-USB-TP-LCD, EL-USB-TP-LCD+.
